

The ALPS™ Thumb Brace restricts motion to the wrist, thumb, and metacarpal joints following surgery or injury. The thumb is immobilized in a natural position, relieving pain and helping to prevent re-injury. The brace contains a removable, metal stay on the palmar surface for custom fit and adjustment.

- Lightweight and durable fabric
- Thumb spica supports and protects the thumb
- Adjustable thumb strap enhances ease of application and patient fit
- Soft comfortable liner with stretch and support
- Latex Free
