

The ALPS™ Wrist Brace restricts motion to the wrist and metacarpal joints following surgery or injury. The wrist is immobilized in a natural position by direct compression, relieving pain and helping to prevent re-injury. The brace contains a removable, malleable palmar stay support for custom fit and adjustment.

- Firm support for sprains and strains
- Provides compression and support
- Highest degree of durability and immobilization
- Soft comfortable liner with stretch and support
- Breathable and functional wrist support to support the CMC & MP joints
- Latex Free
